Instructions for Installation and Usage

1. Preparation:

- Gather necessary tools, including a wrench and a cleaning cloth.
- Ensure the shotgun is completely unloaded and safe to handle.

2. Removing the Old Tube Nut:

- Locate the foreend tube assembly on your Remington 870 Lightweight shotgun.
- Use the wrench to carefully unscrew the old tube nut, turning it counterclockwise.

- Remove the old nut and set it aside.

3. Installing the New Tube Nut:

- Take the new Remington 20GA ForeEnd Tube Nut Blank.
- Align the nut with the foreend tube assembly.
- Handtighten the nut by turning it clockwise until snug.
- Use the wrench to secure the nut further, but do not overtighten.

4. Final Inspection:

- Ensure that the foreend tube is securely attached and aligned properly.
- Perform a function check by cycling the action of the shotgun to ensure smooth operation.

5. Usage:

- Follow all operational guidelines for your Remington 870 Lightweight shotgun.
- Always ensure the shotgun is pointed in a safe direction when handling.

Disposal Instructions

- Dispose of any old or damaged parts in accordance with local regulations.
- Do not dispose of the foreend tube nut in regular household waste. Instead, check for local recycling programs or hazardous waste disposal options.
