

GRIP INSERTS - RANSOM GRIP INSERTS FOR S&W 22 VICTORY

RANSOM INTERNATIONAL GRIP INSERTS Do not use hard grip inserts or 3D-printed plastic grip inserts for your Master Series Ransom Rest. Hard inserts damage the gun by generating destructive recoil energy that travels through the frame and barrel. Not only that, most hard or 3D-printed inserts are poorly engineered and fail to replicate human-like recoil, rendering any test data invalid. Hard grip inserts will not provide repeatable test results to your hand and the end user of the firearm. The grip inserts are specifically designed to match the durometer of the human hand. The inserts absorb the first few milliseconds of shot before the machine can even mechanically recoil. Look at the photo attached here: You can see the bullet has left the barrel. The machine has not come out of a lowered battery position, and the slide has not come out of lockup. The first few milliseconds of vibration and recoil are absorbed by the insert before the machine can even respond. Why will a hard insert damage your gun? The simplest, most direct answer is that physics teaches us that every action has an equal and opposite reaction. Therefore, Chuck Ransom always said vibration and recoil cannot be stopped; they can only be repeatedly controlled. If these forces do not have somewhere to travel, they will find a way to go. Just as lightning and water will find a way to travel and move, so will vibration and recoil. The inserts are specifically designed to act like the human hand, absorbing these forces and not transferring them into the gun. The Ransom rest insert absorbs vibration and harmonics, then properly transfers the energy into the rest to recoil as a human does coaxially. This whole unit functions similarly to how your hand absorbs the recoil and vibration. The grip inserts and machine, as a pair, are specifically designed to absorb this. This damage may not be seen right away, but it accrues with each shot. A hard insert will decrease the life of the barrel and gun, and it may possibly cause injury or death if something occurs. A hard insert will not be duplicatable to the end user. Whether destructive testing or accuracy testing, you must mimic the human, or your test is flawed. If a hard or 3d printed insert worked. Then every gun manufacturer would already be using them, and there would be no need for a Ransom Rest company. Take note and caution, many have tried, and many have found out the hard way. Caution: Don't use hard or 3D-printed inserts.

Safety Instruction Guide for GRIP INSERTS

RANSOM GRIP INSERTS FOR S&W 22 VICTORY

Introduction

Thank you for choosing the Ransom International Grip Inserts for your S&W 22 Victory. This guide provides essential safety instructions and guidelines to ensure the safe use of this product. Please read this manual thoroughly before installation and usage.

General Safety Guidelines

- Ensure that the grip inserts are compatible with your firearm model to avoid any safety issues.
- Always follow the manufacturer's instructions for installation and usage.
- Regularly inspect the grip inserts for signs of wear or damage before use.
- Do not use hard grip inserts or 3Dprinted plastic grip inserts, as they may cause damage to your firearm.
- Keep the product out of reach of children and vulnerable individuals.
- Report any unsafe conditions or incidents to the relevant authorities immediately.

Specific Safety Precautions for Use

- **Avoid Hard Inserts:** Hard grip inserts can generate destructive recoil energy that may damage your firearm. Use only the specified grip inserts designed for your firearm.
- **Recoil Management:** The grip inserts are designed to absorb recoil and vibration similar to the human hand. Using inappropriate inserts can lead to inaccurate test results and potential injury.
- **Testing Procedures:** When conducting accuracy testing or destructive testing, ensure that you are mimicking humanlike recoil to obtain valid results.
- **LongTerm Use:** Be aware that using hard inserts may decrease the lifespan of your firearm and could potentially lead to injury or death.

Instructions for Installation and Usage

1. Installation:

- Ensure the firearm is unloaded and in a safe condition before beginning installation.
- Remove any existing grip inserts from the firearm.
- Align the Ransom Grip Inserts with the mounting points on your firearm.
- Securely attach the grip inserts, ensuring they are firmly in place.

2. Usage:

- Always handle the firearm with care and follow standard firearm safety practices.
- Regularly check the grip inserts for wear or damage during use.
- If you notice any issues, discontinue use immediately and replace the grip inserts.

Disposal Instructions

- Dispose of any damaged or worn grip inserts in accordance with local regulations.
- Do not throw grip inserts in regular household waste if they are made of materials that require special disposal methods.

Contact Information for Further Support

For any safety inquiries or support related to the Ransom Grip Inserts, please refer to the manufacturer's contact information provided with the product packaging.

By following these guidelines, you can ensure a safer experience while using the Ransom International Grip Inserts for your S&W 22 Victory. Your safety is our priority, and we appreciate your commitment to responsible firearm use.
