

GRIP INSERTS - RANSOM GRIP INSERTS SPRINGFIELD ARMORY XD 9/45

RANSOM INTERNATIONAL GRIP INSERTS Do not use hard grip inserts or 3D-printed plastic grip inserts for your Master Series Ransom Rest. Hard inserts damage the gun by generating destructive recoil energy that travels through the frame and barrel. Not only that, most hard or 3D-printed inserts are poorly engineered and fail to replicate human-like recoil, rendering any test data invalid. Hard grip inserts will not provide repeatable test results to your hand and the end user of the firearm. The grip inserts are specifically designed to match the durometer of the human hand. The inserts absorb the first few milliseconds of shot before the machine can even mechanically recoil. Look at the photo attached here: You can see the bullet has left the barrel. The machine has not come out of a lowered battery position, and the slide has not come out of lockup. The first few milliseconds of vibration and recoil are absorbed by the insert before the machine can even respond. Why will a hard insert damage your gun? The simplest, most direct answer is that physics teaches us that every action has an equal and opposite reaction. Therefore, Chuck Ransom always said vibration and recoil cannot be stopped; they can only be repeatedly controlled. If these forces do not have somewhere to travel, they will find a way to go. Just as lightning and water will find a way to travel and move, so will vibration and recoil. The inserts are specifically designed to act like the human hand, absorbing these forces and not transferring them into the gun. The Ransom rest insert absorbs vibration and harmonics, then properly transfers the energy into the rest to recoil as a human does coaxially. This whole unit functions similarly to how your hand absorbs the recoil and vibration. The grip inserts and machine, as a pair, are specifically designed to absorb this. This damage may not be seen right away, but it accrues with each shot. A hard insert will decrease the life of the barrel and gun, and it may possibly cause injury or death if something occurs. A hard insert will not be duplicatable to the end user. Whether destructive testing or accuracy testing, you must mimic the human, or your test is flawed. If a hard or 3d printed insert worked. Then every gun manufacturer would already be using them, and there would be no need for a Ransom Rest company. Take note and caution, many have tried, and many have found out the hard way. Caution: Don't use hard or 3D-printed inserts.

Introduction

Thank you for choosing the Ransom International Grip Inserts for your Master Series Ransom Rest. This guide provides essential safety instructions, usage guidelines, and important information to ensure safe operation and longevity of your firearm and equipment. Please read this guide thoroughly before using the product.

General Safety Guidelines

- Always ensure that the firearm is unloaded before attaching or removing the grip inserts.
- Use only Ransom International Grip Inserts designed specifically for your firearm model.
- Avoid using hard grip inserts or 3Dprinted plastic grip inserts as they can cause damage to your firearm.
- Be aware that improper use of grip inserts can lead to inaccurate test results and potential harm.
- Regularly inspect your grip inserts for wear and damage. Replace them if they show signs of deterioration.
- Follow all local laws and regulations regarding the use of firearms and shooting equipment.

Specific Safety Precautions for Use

• Potential Hazards:

- Vibration and recoil can cause damage to your firearm if not properly managed.
- Hard inserts can lead to increased wear and tear on the barrel and gun.
- Improperly designed inserts may result in inaccurate shooting results.

• Instructions to Avoid Hazards:

- Always use grip inserts that match the durometer of the human hand to absorb recoil effectively.
- Do not attempt to modify or adapt the grip inserts in any way.
- Ensure that the Ransom Rest is set up on a stable, flat surface to prevent accidents.
- Use protective gear, such as eye and ear protection, when operating firearms.

• Warnings:

- This product is not suitable for children. Keep out of reach of minors.
- If you experience any unusual sounds or movements during operation, stop using the product immediately and inspect it for damage.

Instructions for Installation and Usage

• Installation:

1. Ensure that your firearm is unloaded and pointed in a safe direction.
2. Remove any existing grip inserts from the Ransom Rest.
3. Align the Ransom International Grip Inserts with the designated slots on the Ransom Rest.
4. Press down firmly to secure the inserts in place.
5. Doublecheck that the inserts are properly installed and stable before proceeding.

• Usage:

1. Place your firearm into the Ransom Rest, ensuring it is securely held in place.
2. Conduct your shooting tests as required, being mindful of the recoil and vibration.
3. After use, remove the firearm from the Ransom Rest and inspect the grip inserts for any signs of wear or damage.

Disposal Instructions

- Dispose of any damaged or worn grip inserts in accordance with local regulations for plastic waste.
- Do not dispose of the inserts in regular household waste if they are made from materials that require special handling.
- Consult local waste management guidelines for proper disposal methods.
