For over 52 years, Ransom Rests® has been known for providing the most versatile durable and robust gun testing machines and rests on the market. Master Series Rests have been designed to give maximum stability and hold virtually any handheld gun or rifle. A Ransom Rest is known as the industry standard for accuracy testing. Attesting to this is its worldwide use by almost all gun manufacturers, ballistic testers, law enforcement, and the military. A Safe, Accurate, and Dependable Testing Machine Portions of their new machine are manufactured from different grades of alloy specifically chosen for their strength, their resistance to corrosion,. Everything is designed to bring the tester and enthusiast a tool that is safe, accurate, dependable, and trusted. Ransom are proud to say that their product is manufactured in the United States for use here and abroad. They back this product with instruction manuals, online video, and phone support. It is their goal to have their customers' needs and expectations met or exceeded. Check their website for adapters, upgrades, and options for this product. This machine was designed to be as adaptable and adjustable as possible to support the widest range of firearms. If you have an idea for improvements or changes, please contact us. THE GENERAL FEATURES OF THE MACHINE ARE AS FOLLOWS: A portable machine able to clamp or strap to almost all benches or tables, as needed. Linear bearings allowing for full slide recoil. Fully adjustable front and rear clamp carriage assembly to hold firearms securely and allow full-forward adjustment to keep the barrel where you want it: in a bullet trap or water tank. M2® ratcheting safety straps and M2® ratcheting buckles (2 in front, one in rear) to securely hold down the firearm. Carriage plate and clamp assemblies that are easily changed, allowing for adaptability or add on, as needed. Separate carriage clamp box pistol mount that is easily changed out: allowing a solid, safe connection for pistols and revolvers. This pistol box clamp mount also includes its own adjustable trigger and clamp pads. Pistol box clamp fixture also includes adjustable front v clamp to secure revolver barrels or allow for a safety support under the barrel. This also allows a solid stop catch above the barrel in case of semi-auto pistol barrel lift. All carriage clamping fixture plates are fully adjustable. They have 4 carriage cam lever locks to lock the carriage plates to the position that best fits the gun being tested. Rear butt stock plate and leather butt stop pad solidly accepts the recoil. Multiple rear adjustable butt stock clamping positions. Multiple front adjustable clamp ears for clamping positions. Adjustable trigger slide lock assemblies with adjustable trigger finger, allowing precise firing adjustments for the rifle being tested. Left-side and right-side trigger assemblies are also included. Adjustable recoil rebound spring - 2 styles included. Machine Dimensions are 50" long 11" wide and 14" tall. With the upright adjusters up this makes machine 33" tall Total machine weight is approximately 85 lbs. Made in the USA.
