

DEADLOCK CHARGING HANDLE CQB FOR AR15/M4 - SENTRY MANUFACTURING DEADLOCK CHARGING HANDLE CQB FOR AR15/M4 BLACK

SENTRY MANUFACTURING DEADLOCK CHARGING HANDLE CQB FOR AR15/M4

The Sentry Manufacturing DEADLOCK CQB Charging Handle is a premium AR-15/M4 charging handle designed to enhance reliability, durability, and overall shooter performance in demanding tactical environments. At the core of its design is a patent-pending dual-locking system that helps prevent unintended charging handle movement caused by gear snags or obstacles, reducing the likelihood of weapon malfunctions when reliability matters most. Its innovative independent dual-latch architecture allows the charging handle to remain operational even if one side becomes damaged. This design also provides balanced actuation forces, resulting in smoother and more consistent manipulation during operation. To improve shooter comfort, the DEADLOCK CQB features advanced gas-management technology. A patented hard-stop gas key channel combined with a full upper-receiver encompassing high-shelf geometry significantly reduces gas blowback, helping keep gases away from the shooter's face during firing. The charging handle is built for positive control in harsh conditions. Aggressive texturing on both the wings and activation buttons provides a secure grip when operating with wet hands, gloves, or in adverse environmental conditions. Durability is further enhanced through a reinforced angled gusset at the gas key contact interface. This structural upgrade delivers approximately 30% greater strength compared to conventional charging handle designs, helping it withstand heavy use and demanding operational conditions. Manufactured from precision-machined 7075-T6 aircraft-grade aluminum, the DEADLOCK CQB is finished with MIL-SPEC Type III hard-coat anodizing for superior wear resistance, corrosion protection, and long-term service life. Each charging handle includes a button override pin, allowing users to convert the system to traditional charging handle operation if desired. The assembly also incorporates U.S.-manufactured extreme-duty hardware throughout, ensuring dependable performance and rugged durability. FEATURES Patented DEADLOCK dual locking system that eliminates snags from causing unwanted weapon charging or malfunctions Truly ambidextrous wing design with independent latch engagement; allowing the charging handle to continue normal operation with either wing missing. This design also provides equal wing tension for smoother operation Aggressive wing and button texturing provide a secure grip in even the harshest environments Angled gusset at gas key contact point proves 30% greater strength than standard charging handles, resulting in less failures during hard use All handles ship with a button override pin, allowing the button to be pinned forward and DEADLOCK to be used as a traditional charging handle Patented shortened hard stop gas key channel and complete upper encompassing high shelf design for unparalleled gas blowback mitigation ALL parts are precision milled from aircraft grade 7075 aluminum and type III hard anodized for longevity and corrosion resistance Extreme duty, US made hardware

Safety Instruction Guide for DEADLOCK CHARGING HANDLE CQB FOR AR15/M4

Introduction

Thank you for choosing the Sentry Manufacturing DEADLOCK Charging Handle CQB for AR15/M4. This guide provides important safety instructions and guidelines to ensure the safe and effective use of your charging handle. Please read this document carefully before use.

General Safety Guidelines

- Ensure that you are familiar with the operation of your AR15/M4 firearm before using the DEADLOCK Charging Handle.
- Always handle firearms with care and follow basic safety rules, including treating every firearm as if it is loaded.
- Store the charging handle in a secure location away from children and unauthorized users.
- Regularly inspect your charging handle for any signs of wear or damage before each use.
- If you observe any defects or malfunctions, discontinue use immediately and consult a qualified gunsmith.

Specific Safety Precautions for Use

- Do not use the charging handle if it is damaged or if any parts are missing.
- Ensure that the charging handle is properly installed and securely fastened before operating your firearm.
- Avoid using excessive force when operating the charging handle to prevent damage.
- Be aware of your surroundings and ensure that no obstructions are present that could interfere with the operation of the charging handle.
- Use appropriate personal protective equipment, such as safety glasses and hearing protection, when operating your firearm.

Instructions for Installation and Usage

Installation

1. **Ensure Safety:** Before installation, ensure that your firearm is unloaded and pointed in a safe direction.
2. **Remove Existing Charging Handle:** If applicable, remove the current charging handle from your AR15/M4.
3. **Align Charging Handle:** Position the DEADLOCK Charging Handle CQB so that it aligns with the upper receiver of your firearm.
4. **Insert Charging Handle:** Slide the charging handle into the receiver until it is fully seated.
5. **Secure Charging Handle:** Ensure that the charging handle is securely in place and that it operates smoothly.

Usage

- To charge your firearm, grasp the wings of the charging handle and pull it back firmly.
- Ensure that the handle is fully returned to its original position after charging.
- If using the button override pin, follow the instructions included with the pin to convert to traditional charging handle operation.

Disposal Instructions

- Dispose of the DEADLOCK Charging Handle responsibly.

- If the product is damaged beyond repair, contact your local waste disposal authority for guidance on proper disposal methods.
