SENTRY MANUFACTURING DEADLOCK CHARGING HANDLE CQB FOR AR15/M4

The Sentry Manufacturing DEADLOCK CQB Charging Handle is a premium AR-15/M4 charging handle designed to enhance reliability, durability, and overall shooter performance in demanding tactical environments. At the core of its design is a patent-pending dual-locking system that helps prevent unintended charging handle movement caused by gear snags or obstacles, reducing the likelihood of weapon malfunctions when reliability matters most. Its innovative independent dual-latch architecture allows the charging handle to remain operational even if one side becomes damaged. This design also provides balanced actuation forces, resulting in smoother and more consistent manipulation during operation. To improve shooter comfort, the DEADLOCK CQB features advanced gas-management technology. A patented hard-stop gas key channel combined with a full upper-receiver encompassing high-shelf geometry significantly reduces gas blowback, helping keep gases away from the shooter's face during firing. The charging handle is built for positive control in harsh conditions. Aggressive texturing on both the wings and activation buttons provides a secure grip when operating with wet hands, gloves, or in adverse environmental conditions. Durability is further enhanced through a reinforced angled gusset at the gas key contact interface. This structural upgrade delivers approximately 30% greater strength compared to conventional charging handle designs, helping it withstand heavy use and demanding operational conditions. Manufactured from precision-machined 7075-T6 aircraft-grade aluminum, the DEADLOCK CQB is finished with MIL-SPEC Type III hard-coat anodizing for superior wear resistance, corrosion protection, and long-term service life. Each charging handle includes a button override pin, allowing users to convert the system to traditional charging handle operation if desired. The assembly also incorporates U.S.-manufactured extreme-duty hardware throughout, ensuring dependable performance and rugged durability.

FEATURES

- Patented DEADLOCK dual locking system that eliminates snags from causing unwanted weapon charging or malfunctions
- Truly ambidextrous wing design with independent latch engagement; allowing the charging handle to continue normal operation with either wing missing. This design also provides equal wing tension for smoother operation
- Aggressive wing and button texturing provide a secure grip in even the harshest environments
- Angled gusset at gas key contact point proves 30% greater strength than standard charging handles, resulting in less failures during hard use
- All handles ship with a button override pin, allowing the button to be pinned forward and DEADLOCK to be used as a traditional charging handle
- Patented shortened hard stop gas key channel and complete upper encompassing high shelf design for unparalleled gas blowback mitigation
- ALL parts are precision milled from aircraft grade 7075 aluminum and type III hard anodized for longevity and corrosion resistance
- Extreme duty, US made hardware

Safety Instruction Guide for SENTRY MANUFACTURING DEADLOCK CHARGING HANDLE CQB FOR AR15/M4

Introduction

Thank you for choosing the SENTRY MANUFACTURING DEADLOCK CHARGING HANDLE CQB FOR AR15/M4. This product is designed to enhance your shooting experience while ensuring safety and reliability. It is essential to read and understand these safety instructions to ensure proper use and maintenance of the charging handle.

General Safety Guidelines

- Always treat every firearm as if it is loaded.
- Keep the charging handle and all firearm components out of reach of children and unauthorized users.
- Familiarize yourself with local laws and regulations regarding firearm accessories and usage.
- Inspect the charging handle regularly for any signs of wear or damage before use.
- Ensure that the firearm is unloaded before installing or removing the charging handle.
- Do not use the charging handle if it shows signs of damage or malfunction.
- Always wear appropriate safety gear, including eye and ear protection, when using firearms.
- Report any unsafe products or incidents to the relevant authorities.

Specific Safety Precautions for Use

- Ensure that the charging handle is properly installed according to the instructions provided.
- Do not force the charging handle; if it does not operate smoothly, check for obstructions or misalignment.
- Avoid using the charging handle in extreme environmental conditions without proper precautions.
- Be cautious of gas blowback; ensure your face is clear of the charging handle area during operation.
- Use the button override pin only as instructed; improper use can lead to malfunction.
- Always keep your fingers away from the trigger until you are ready to fire.

Instructions for Installation and Usage

Installation

1. **Ensure Safety:** Confirm that the firearm is unloaded and pointed in a safe direction.
2. **Remove Old Charging Handle:** If applicable, remove the existing charging handle by following the manufacturer's instructions.
3. **Insert the DEADLOCK Charging Handle:** Align the charging handle with the upper receiver and slide it into place until it clicks securely.
4. **Test Functionality:** Gently pull the charging handle to ensure it operates smoothly and without obstruction.
5. **Secure the Handle:** Make sure the charging handle is firmly in place before using the firearm.

Usage

- To operate the charging handle, grip it firmly and pull it back smoothly to chamber a round or clear a malfunction.
- If using the button override feature, ensure the button is pinned forward as per the instructions provided.
- After use, always return the charging handle to its resting position.

Disposal Instructions

- Dispose of the charging handle responsibly. Follow local regulations for the disposal of metal products.
- If the charging handle is damaged beyond repair, consider recycling it at a designated facility.
