

Donar - No-Spill Powder Pan

The **Wolfskrieger Donar No-Spill Powder Pan** was developed to eliminate one of the most common frustrations in precision reloading: spilled powder. Unlike conventional powder pans, its specially engineered geometry helps prevent powder kernels from jumping or spilling out during handling. The result is cleaner, more controlled powder transfer with less powder ending up on the bench. Donar is designed to transfer powder directly into the cartridge case, eliminating the need for a separate funnel and reducing unnecessary steps in the loading process.

Every Kernel Matters

In precision reloading, consistency is built on small details. A carefully weighed charge should arrive in the cartridge case exactly as it left the scale. Spilled kernels, powder trapped in a funnel, or repeated transfers introduce unnecessary variation and interrupt the loading process. The No-Spill Powder Pan is designed to keep the complete charge under control from weighing to filling.

Direct Transfer - No Funnel Required

Every additional handling step creates another opportunity to lose powder. With a conventional setup, the charge is transferred from the scale or auto trickler into a powder pan, then through a funnel and finally into the cartridge case. Powder kernels can be spilled along the way or remain trapped inside the funnel. Donar removes that additional step. Its integrated pouring geometry allows the measured charge to be transferred **directly from the pan into the cartridge case**.

Fewer steps. Less mess. More consistency.

Two Nozzles - One Pan

Not every case arrives at the loading stage in exactly the same condition. For this reason, Donar features **two dedicated pouring nozzles**. One side is optimized for clean, carefully prepared cartridge cases. The second is designed to provide reliable powder transfer when cases may still contain traces of sizing lubricant or other residue after case preparation. Simply rotate the pan and use the nozzle that best matches the brass in front of you.

One Pan for Almost Every Caliber

Donar was designed to eliminate the need for a collection of caliber-specific funnels and adapters.

Its geometry allows direct filling across an exceptionally wide range of cartridge sizes - from small-caliber cases all the way up to large cartridges such as **.600 Nitro Express**. One pan. Two nozzles. Virtually every cartridge on the bench.

Designed Around the Workflow

The No-Spill Powder Pan is not about adding another tool to the reloading process. It is about removing unnecessary ones. Pick up the charge directly from your scale or auto trickler, move it to the case, pour, and continue loading.

No separate funnel. No additional transfer. No unnecessary interruption.

Key Features

1. Engineered no-spill geometry
2. Helps prevent powder kernels from jumping out during handling
3. Direct transfer from pan to cartridge case
4. No separate powder funnel required
5. Two dedicated pouring nozzles
6. Suitable for clean and lubricated cartridge cases
7. Extremely broad caliber compatibility
8. Works with cartridges from small calibers up to .600 Nitro Express
9. Ideal for precision scales and auto tricklers
10. Faster and cleaner powder handling

Fewer steps. Less mess. More consistency.

DONAR - Tame the Thunder, One Round at a Time.

Attributes

- Name: Donar - No-Spill Powder Pan
- Manufacturer: WOLFSKRIEGER
- Product no.: EU2018759
- Mfr. No.: WKG-1512-BLK
- Shipping height: 100mm
- Shipping width: 100mm
- Shipping length: 100mm
- UPC: 726529842470

Donar NoSpill Powder Pan Safety Instructions

Introduction

Thank you for choosing the Donar NoSpill Powder Pan by Wolfskrieger. This product is designed to enhance your precision reloading experience while ensuring safety during use. Please read this manual carefully to understand the safety guidelines and instructions for proper use.

General Safety Guidelines

To ensure safe use of the Donar NoSpill Powder Pan, please follow these general safety guidelines:

- Always handle the powder pan in a wellventilated area to avoid inhaling any powder particles.
- Keep the powder pan away from open flames and high temperatures to prevent any fire hazards.
- Store the powder pan in a dry place, away from moisture, to prevent powder degradation or clumping.
- Ensure that the powder pan is clean and free from residues before use.
- Always keep the powder pan out of reach of children and vulnerable individuals.

Specific Safety Precautions for Use

When using the Donar NoSpill Powder Pan, please observe the following safety precautions:

- **Avoid Overfilling:** Do not exceed the recommended charge capacity to prevent spills.
- **Check for Damage:** Inspect the powder pan for any cracks or damages before use. Do not use if damaged.
- **Use Appropriate Powder:** Ensure that the powder used is suitable for the reloading process and compatible with the powder pan.
- **Handle with Care:** Always handle the powder pan gently to avoid accidental spills or breakage.
- **Follow Proper Loading Procedures:** Adhere to best practices for loading cartridges to minimize the risk of accidents.

Instructions for Installation and Usage

To ensure optimal performance and safety, please follow these instructions for installation and usage of the Donar NoSpill Powder Pan:

1. Preparation:

- Ensure your workspace is clean and free from clutter.
- Gather all necessary materials, including your scale or auto trickler and cartridge cases.

2. Using the Powder Pan:

- Place the powder pan on a stable surface.
- Weigh your desired powder charge using a precision scale or auto trickler.
- Carefully transfer the measured charge directly into the powder pan.
- Choose the appropriate nozzle based on the condition of your cartridge cases:
 - Use the first nozzle for clean cases.
 - Use the second nozzle for cases that may have traces of sizing lubricant.
- Rotate the pan as needed to direct the flow of powder into the cartridge case.

3. After Use:

- Clean the powder pan thoroughly to remove any residual powder.
- Store the powder pan in a safe location away from children and pets.

Disposal Instructions

When disposing of the Donar NoSpill Powder Pan, please follow these guidelines:

- Dispose of the product in accordance with local regulations for nonhazardous materials.
- Ensure that any remaining powder is disposed of safely and responsibly.
- Do not throw the powder pan in the fire or expose it to extreme heat.

Contact Information for Further Support

For any safety inquiries or concerns regarding the Donar NoSpill Powder Pan, please refer to the manufacturer's contact information provided with your product packaging. It is important to reach out to the manufacturer for support and guidance on safety matters.

Thank you for prioritizing safety while using the Donar NoSpill Powder Pan. Enjoy your precision reloading experience!
